Behind Time: The incoherence of time and McTaggart's atemporal replacement Gerald Rochelle

The Cambridge philosopher J.McT.E McTaggart (1868-1925) was the last of the great British idealists. In his closely worked philosophy he describe a coherent world without time--the C series world of perception. He exposes the puzzling nature of time by showing us that it is possible to understand reality without time. The central elements of this atemporal world have strong psychological appeal and this idealist view is not out of place in modern times.
