Master the Tricks of the S.A.T. Michael Solis

No high school student wants to do it, but just about all of them will find themselves staring directly into the beast. If there are three letters high school juniors hate most, they are S, A, and T. While this three-letter word is loathed by many and dreaded by most, it is a necessary component for anyone who wishes to attend an undergraduate college in the United States.

The SAT's subject material is taught in every high school, but that hardly makes it easy, and most students will look for study guides outside of simply remembering their 10th grade algebra homework. This eBook, prepared by Ivy League graduates, presents a basic overview of what tricks SAT test-takers can learn to boost their scores in each of the testing sections. It dedicates one chapter to each of the testing sections: critical reading, writing, and mathematics, while giving sample problems that are based on SAT problems that have been seen on actual tests. The goal of this eBook is to help SAT test-takers learn the traps used to trick students, as well as ways to better prepare for each of the sections.
