Connectome: How the Brain's Wiring Makes Us Who We Are [Audiobook, CD, Unabridged] (Connectome) by Sebastian Seung SS

We know that each of us is unique, but science has struggled to pinpoint where, precisely, our uniqueness resides. Is it in our genes? The structure of our brains? Our genome may determine our eye color and even aspects of our personality. But our friendships, failures, and passions also shape who we are. The question is: how? Sebastian Seung, a dynamic professor at MIT, is on a quest to discover the biological basis of identity. He believes it lies in the pattern of connections between the brain's neurons, which change slowly over time as we learn and grow. The connectome, as it's called, is where our genetic inheritance intersects with our life experience. It's where nature meets nurture. Seung introduces us to the dedicated researchers who are mapping the brain's connections, neuron by neuron, synapse by synapse. It is a monumental undertaking - the scientific equivalent of climbing Mount Everest - but if they succeed, it could reveal the basis of personality, intelligence, memory, and perhaps even mental disorders. Many scientists speculate that people with anorexia, autism, and schizophrenia are "wired differently," but nobody knows for sure. The brain's wiring has never been seen clearly. In sparkingly clear prose, Seung reveals the amazing technological advances that will soon help us map connectomes. He also examines the evidence that these maps will someday allow humans to "upload" their minds into computers, achieving a kind of immortality. Connectome is a mind-bending adventure story, told with great passion and authority. It presents a daring scientific and technological vision for at last understanding what makes us who we are. Welcome to the future of neuroscience.

From reader reviews:

Celina Ziolkowski:

Book is to be different for every single grade. Book for children until eventually adult are different content. As you may know that book is very important for people. The book Connectome: How the Brain's Wiring Makes Us Who We Are [Audiobook, CD, Unabridged] (Connectome) by Sebastian Seung ended up being making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The publication Connectome: How the Brain's Wiring Makes Us Who We Are [Audiobook, CD, Unabridged] (Connectome) by Sebastian Seung is not only giving you much more new information but also to get your friend when you sense bored. You can spend your spend time to read your publication. Try to make relationship with the book Connectome: How the Brain's Wiring Makes Us Who We Are [Audiobook, CD, Unabridged] (Connectome) by Sebastian Seung. You never truly feel lose out for everything if you read some books.

Marlin Peterson:

Connectome: How the Brain's Wiring Makes Us Who We Are [Audiobook, CD, Unabridged] (Connectome) by Sebastian Seung can be one of your starter books that are good idea. We recommend that straight away because this guide has good vocabulary that may increase your knowledge in terminology, easy to understand, bit entertaining but still delivering the information. The article writer giving his/her effort to put every word into joy arrangement in writing Connectome: How the Brain's Wiring Makes Us Who We Are [Audiobook, CD, Unabridged] (Connectome) by Sebastian Seung although doesn't forget the main stage, giving the reader the hottest and also based confirm resource facts that maybe you can be certainly one of it. This great information can drawn you into brand new stage of crucial contemplating.

Jack McCurdy:

You can find this Connectome: How the Brain's Wiring Makes Us Who We Are [Audiobook, CD, Unabridged] (Connectome) by Sebastian Seung by go to the bookstore or Mall. Simply viewing or reviewing it could to be your solve trouble if you get difficulties for ones knowledge. Kinds of this reserve are various. Not only by written or printed and also can you enjoy this book by simply e-book. In the modern era including now, you just looking from your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose suitable ways for you.

Ricardo Hempel:

A lot of book has printed but it differs. You can get it by internet on social media. You can choose the top book for you, science, amusing, novel, or whatever by means of searching from it. It is known as of book Connectome: How the Brain's Wiring Makes Us Who We Are [Audiobook, CD, Unabridged] (Connectome) by Sebastian Seung. You can add your knowledge by it. Without departing the printed book, it could add

your knowledge and make you actually happier to read. It is most important that, you must aware about publication. It can bring you from one spot to other place.
