Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) Rudolf Fritsch, Renzo Piccinini

This book describes the construction and the properties of CW-complexes. These spaces are important because firstly they are the correct framework for homotopy theory, and secondly most spaces that arise in pure mathematics are of this type. The authors discuss the foundations and also developments, for example, the theory of finite CW-complexes, CW-complexes in relation to the theory of fibrations, and Milnor's work on spaces of the type of CW-complexes. They establish very clearly the relationship between CW-complexes and the theory of simplicial complexes, which is developed in great detail. Exercises are provided throughout the book; some are straightforward, others extend the text in a non-trivial way. For the latter; further reference is given for their solution. Each chapter ends with a section sketching the historical development. An appendix gives basic results from topology, homology and homotopy theory. These features will aid graduate students, who can use the work as a course text. As a contemporary reference work it will be essential reading for the more specialized workers in algebraic topology and homotopy theory.

From reader reviews:

Pauline Bardwell:

Book is written, printed, or highlighted for everything. You can recognize everything you want by a publication. Book has a different type. As it is known to us that book is important thing to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A guide Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) will make you to end up being smarter. You can feel much more confidence if you can know about almost everything. But some of you think which open or reading any book make you bored. It is far from make you fun. Why they could be thought like that? Have you in search of best book or ideal book with you?

Michael Short:

The book Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) can give more knowledge and information about everything you want. So just why must we leave the best thing like a book Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics)? A few of you have a different opinion about publication. But one aim that book can give many data for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or facts that you take for that, you could give for each other; you may share all of these. Book Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) has simple shape but you know: it has great and big function for you. You can search the enormous world by available and read a publication. So it is very wonderful.

Ana Smith:

Nowadays reading books are more than want or need but also become a life style. This reading habit give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book that improve your knowledge and information. The details you get based on what kind of reserve you read, if you want get more knowledge just go with training books but if you want really feel happy read one with theme for entertaining including comic or novel. Often the Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) is kind of reserve which is giving the reader unforeseen experience.

Michael Clements:

Many people spending their time frame by playing outside using friends, fun activity together with family or just watching TV all day every day. You can have new activity to shell out your whole day by examining a book. Ugh, think reading a book can definitely hard because you have to accept the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Smartphone. Like Cellular Structures in Topology (Cambridge Studies in Advanced Mathematics) which is getting the e-book version. So , try out this book? Let's see.
