Is Love Even Possible?: ...where only one heart beats, waiting for another to share romantic interludes with sexual encounters, to replace a fear of dying completely alone... Paul Clarence

All they had against them was a deadly and normally incurable communicable disease, one career full of deep secrets, another career struggling to get known and accepted, an ancient culture versus a modern culture, and half a world of distance; yet they could not just forget each other. It would take time.

This is a suspense love story from the male perspective written with humor and respect for the complexity of mature adult sexual romance relationships.

He was out of work due to massive lay-offs and so he was looking for any job that would help pay the rent. But his first real break was an offer from a foreign corporation for a temporary assignment in an undisclosed location. It was the kind of offer that might endanger his security clearances and so he had to check that out first. And it turned out that he could take the temporary job if he could accept the odd contract that came with it.

He did not know where he was going and could not tell anyone except the FBI or CIA where he had been, and then only if it was necessary to protect his security clearance. The mystery island that was his objective would require just about every immunization known to man. He did not know what he was going to work on, but it would also be classified “company confidential.” And he was told that he would be entirely on his own but observed from a distance. He could fail the primary objective and still get some money for the effort but if he got drunk even once, he would be “extracted” and lose all of his pay. However, the promised pay if he succeeded was fat enough that he could not easily walk away from the offer. They had him by the tender parts.

So he swallowed hard and took the job, starting a brief adventure that would haunt his life with dreams and nightmares that would not go away for many years. Things happened that even his employer did not foresee.

When he got home, all he wanted to do was forget. But thirty years later, he would find himself trying to remember every detail, and especially the details about what they did to each other.
