Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence)

Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence)

The objective of this book is to contribute to the development of the intelligent information and database systems with the essentials of current knowledge, experience and know-how.

The book contains a selection of 40 chapters based on original research presented as posters during the 8th Asian Conference on Intelligent Information and Database Systems (ACIIDS 2016) held on 14–16 March 2016 in Da Nang, Vietnam. The papers to some extent reflect the achievements of scientific teams from 17 countries in five continents.

The volume is divided into six parts: (a) Computational Intelligence in Data Mining and Machine Learning, (b) Ontologies, Social Networks and Recommendation Systems, (c) Web Services, Cloud Computing, Security and Intelligent Internet Systems, (d) Knowledge Management and Language Processing, (e) Image, Video, Motion Analysis and Recognition, and (f) Advanced Computing Applications and Technologies.

The book is an excellent resource for researchers, those working in artificial intelligence, multimedia, networks and big data technologies, as well as for students interested in computer science and other related fields.

From reader reviews:

Timothy Larios:

Inside other case, little men and women like to read book Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence). You can choose the best book if you'd prefer reading a book. Provided that we know about how is important a new book Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence). You can add expertise and of course you can around the world by way of a book. Absolutely right, due to the fact from book you can understand everything! From your country until eventually foreign or abroad you will find yourself known. About simple issue until wonderful thing it is possible to know that. In this era, we can open a book or maybe searching by internet device. It is called e-book. You can utilize it when you feel weary to go to the library. Let's go through.

Fred Martinez:

Hey guys, do you really wants to finds a new book you just read? May be the book with the name Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence) suitable to you? The particular book was written by well known writer in this era. The particular book untitled Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence) is a single of several books that will everyone read now. This particular book was inspired many men and women in the world. When you read this reserve you will enter the new dimension that you ever know ahead of. The author explained their idea in the simple way, therefore all of people can easily to comprehend the core of this publication. This book will give you a wide range of information about this world now. So you can see the represented of the world on this book.

Laura Grier:

Reading can called mind hangout, why? Because while you are reading a book specially book entitled Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence) the mind will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely might be your mind friends. Imaging each and every word written in a publication then become one form conclusion and explanation that will maybe you never get ahead of. The Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence) giving you one more experience more than blown away your brain but also giving you useful info for your better life within this era. So now let us teach you the relaxing pattern this is your body and mind will probably be pleased when you are finished studying it, like winning an activity. Do you want to try this extraordinary spending spare time activity?

Joseph Esparza:

What is your hobby? Have you heard this question when you got college students? We believe that that

question was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person just like reading or as looking at become their hobby. You need to understand that reading is very important as well as book as to be the matter. Book is important thing to add you knowledge, except your own teacher or lecturer. You get good news or update concerning something by book. Many kinds of books that can you go onto be your object. One of them is Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence).
