The principles in this book will enable preppers to match their abilities, situation, and needs to realistic threats specific to that person. This book teaches the reader about "normalcy bias" and provides solutions to the challenge of preparing for the worst in the midst of plenty. The result of going through this process will be a road map for satisfying your needs in a realistic and rewarding manner. The PrepSmart book series offers instruction on the principles of personal preparedness. The books help save time and money by moving preppers' thinking from an object-driven, purchase-based approach to one that focuses on personal circumstances, priorities, and abilities. They distill the conventional wisdom on how to prepare down to focused and manageable concepts and topics. Readers can readily choose which subjects they want to learn about without having to sift through useless and uncoordinated information. The books are based on the notion that one should not just prep, but PrepSmart!
