All IP in 3G CDMA Networks: The UMTS Infrastructure and Service Platforms for Future Mobile Systems Jonathan P. Castro

All IP in 3G CDMA Networks covers all the key aspects of UMTS and its implementation from both the engineering designer and the operator and service providers' point of view. It addresses the essential tasks involved in the UMTS network deployment in new regions and within existing 2G/2.5G networks.

Key features:

- Presents solutions for the integration and coexistence of 2G and 3G systems and highlights the seamless interoperability functions between GSM and UMTS.
- As part of the evolution towards All IP cellular networks, it outlines the IP Multimedia Subsystem - IMS and the packet optimized Radio Access Network, including High Speed Download Packet Access.
- Provides a complete picture of broadband wireless through UMTS, whilst describing applications enabler platforms and the criteria for 3G services that enhance the user experience.

By providing one integrated source in UMTS and its evolution, *All IP in 3G CDMA Networks* represents an invaluable resource for design engineers, operators and services providers. Likewise, Technical and Marketing Executives and Managers in wireless communications or related areas, and Business or Sales channels representatives, will benefit from this concise volume in 3G networks and services enablers. Academic programmes in Telecommunications and Information Technology segments at senior or postgraduate level, will also find valuable contributions in this book.

From reader reviews:

Ernest Villa:

Book is written, printed, or highlighted for everything. You can learn everything you want by a guide. Book has a different type. As we know that book is important issue to bring us around the world. Beside that you can your reading proficiency was fluently. A book All IP in 3G CDMA Networks: The UMTS Infrastructure and Service Platforms for Future Mobile Systems will make you to become smarter. You can feel considerably more confidence if you can know about anything. But some of you think which open or reading a new book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you searching for best book or suited book with you?

Mary Thomas:

What do you in relation to book? It is not important with you? Or just adding material if you want something to explain what the one you have problem? How about your time? Or are you busy person? If you don't have spare time to complete others business, it is make one feel bored faster. And you have spare time? What did you do? All people has many questions above. They need to answer that question simply because just their can do that. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need this particular All IP in 3G CDMA Networks: The UMTS Infrastructure and Service Platforms for Future Mobile Systems to read.

Ida Torres:

The actual book All IP in 3G CDMA Networks: The UMTS Infrastructure and Service Platforms for Future Mobile Systems has a lot associated with on it. So when you make sure to read this book you can get a lot of benefit. The book was authored by the very famous author. The author makes some research previous to write this book. This particular book very easy to read you will get the point easily after perusing this book.

Larry Tatro:

People live in this new moment of lifestyle always aim to and must have the time or they will get lot of stress from both way of life and work. So , when we ask do people have free time, we will say absolutely indeed. People is human not really a huge robot. Then we inquire again, what kind of activity do you have when the spare time coming to anyone of course your answer can unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative within spending your spare time, often the book you have read will be All IP in 3G CDMA Networks: The UMTS Infrastructure and Service Platforms for Future Mobile Systems.
