Learning Apache Mahout Chandramani Tiwary

Acquire practical skills in Big Data Analytics and explore data science with Apache Mahout

About This Book

- Learn to use Apache Mahout for Big Data Analytics
- Understand machine learning concepts and algorithms and their implementation in Mahout.
- A comprehensive guide with numerous code examples and end-to-end case studies on Customer Analytics and Text Analytics.

Who This Book Is For

If you are a Java developer and want to use Mahout and machine learning to solve Big Data Analytics use cases then this book is for you. Familiarity with shell scripts is assumed but no prior experience is required.

What You Will Learn

- Configure Mahout on Linux systems and set up the development environment
- Become familiar with the Mahout command line utilities and Java APIs
- Understand the core concepts of machine learning and the classes that implement them
- Integrate Apache Mahout with newer platforms such as Apache Spark
- Solve classification, clustering, and recommendation problems with Mahout
- Explore frequent pattern mining and topic modeling, the two main application areas of machine learning
- Understand feature extraction, reduction, and the curse of dimensionality

In Detail

In the past few years the generation of data and our capability to store and process it has grown exponentially. There is a need for scalable analytics frameworks and people with the right skills to get the information needed from this Big Data. Apache Mahout is one of the first and most prominent Big Data machine learning platforms. It implements machine learning algorithms on top of distributed processing platforms such as Hadoop and Spark.

Starting with the basics of Mahout and machine learning, you will explore prominent algorithms and their implementation in Mahout development. You will learn about Mahout building blocks, addressing feature extraction, reduction and the curse of dimensionality, delving into classification use cases with the random forest and Naive Bayes classifier and item and user-based recommendation. You will then work with clustering Mahout using the K-means algorithm and implement Mahout without MapReduce. Finish with a flourish by exploring end-to-end use cases on customer analytics and text analytics to get a real-life practical know-how of analytics projects.

From reader reviews:

William Walker:

Reading a reserve can be one of a lot of activity that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new information. When you read a reserve you will get new information mainly because book is one of several ways to share the information or their idea. Second, reading through a book will make an individual more imaginative. When you examining a book especially fiction book the author will bring someone to imagine the story how the personas do it anything. Third, it is possible to share your knowledge to other individuals. When you read this Learning Apache Mahout, you can tells your family, friends and soon about yours publication. Your knowledge can inspire others, make them reading a book.

John Augustine:

The book Learning Apache Mahout has a lot info on it. So when you read this book you can get a lot of help. The book was authored by the very famous author. Mcdougal makes some research ahead of write this book. This kind of book very easy to read you can obtain the point easily after looking over this book.

Rhonda Rudder:

Don't be worry in case you are afraid that this book can filled the space in your house, you can have it in e-book means, more simple and reachable. This particular Learning Apache Mahout can give you a lot of friends because by you checking out this one book you have matter that they don't and make a person more like an interesting person. This book can be one of one step for you to get success. This book offer you information that perhaps your friend doesn't learn, by knowing more than additional make you to be great men and women. So , why hesitate? Let us have Learning Apache Mahout.

Joe Timmons:

Book is one of source of knowledge. We can add our understanding from it. Not only for students but native or citizen want book to know the upgrade information of year to help year. As we know those publications have many advantages. Beside we all add our knowledge, can bring us to around the world. From the book Learning Apache Mahout we can take more advantage. Don't you to definitely be creative people? To become creative person must prefer to read a book. Merely choose the best book that suited with your aim. Don't possibly be doubt to change your life at this book Learning Apache Mahout. You can more pleasing than now.
