Origin Management: Rules of Origin in Free Trade Agreements Anne van de Heetkamp, Ruud Tusveld
Origin Management describes a holistic approach that allows internationally operating companies to benefit from reduced import duty rates within Free Trade Agreements (FTAs). Through the creation of a single, auditable, and global platform, companies are enabled to successfully claim preferential origin and sustain, review and audit preferential treatment claims. Seeking to provide a comprehensive treatment of origin management for a professional audience, this book outlines the underlying theoretical concepts and legislative frameworks, and presents practical implications and guidelines for a successful origin management program as part of a strategic sourcing initiative. The authors advocate an approach that involves sharing and distributing information and resources throughout the company and the supply chain, resulting in competitive advantages, synergies, and a central information point for all origin associated issues.
